

## REMARKS

The drawings were objected to under 37 CFR 1.83(a). Specifically, the groove on the top of a mounting means with height control (Figures 4-6), a pulse generating means, and a sensor discriminator means must be shown or the feature(s) canceled from the claim(s). In response, all those features have been canceled from the amended claims.

Claims 1-10 were rejected under 35 USC 103(a) as being unpatentable over Fahs, US #5,132,666 in view of Schweinberger, US #6,129,035. In response, it is believed that the new claims overcome the rejection.

Applicant petitions for any extensions of time past the shortened-statutory period for response. Please charge all fees due and owing to Deposit Account No. 500356 in the name of Greenberg & Lieberman.
